

**ROMANIAN ASSOCIATION FOR  
INFORMATION SECURITY ASSURANCE**

**ACTIVITY REPORT  
2012**

## **RAISA PRESENTATION**

Founded in 2012, RAISA – Romanian Association of Information Security Assurance started as an initiative dedicated to promote standards of security and to fight against cybercrime.

**RAISA aim** is to support and to promote information security activities in compliance with applicable laws and to create a community for the exchange of knowledge between specialists, academic and corporate environment in Romania, community which has to adhere to the following values:

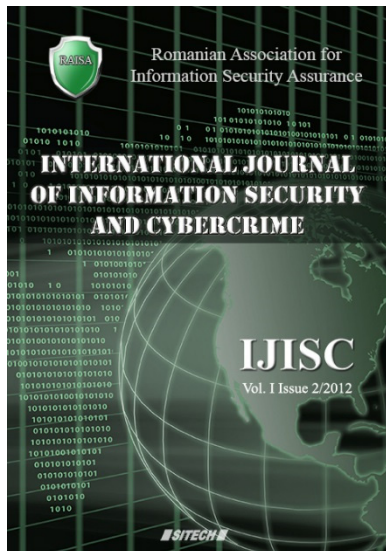

- Continuous investment in education;
- Openness to new methods to secure information;
- Involvement in combating the cybercrime phenomenon;
- Focus on facts;
- Concern for excellence.

**RAISA vision** is to promote research and education in information security field and to contribute to the creation and dissemination of knowledge and technology in this domain. RAISA has a strong representation at the national level, bringing together professors and researchers from top universities and Romanian institutions, PhD, masters and license students, as well as companies in the IT segment.

**RAISA motivation** is that any company, organization or community has benefits by investing in systems security in order to improve security risks when the systems are connected to the Internet.

## **RESEARCH ACTIVITY**

Romanian Association for Information Security Assurance started the project **Scientific Research Promotion in Information Security Field**, code 2012/RAISA/01, with the goal of editing a scientific journal for academic professorial stuff, PhD students, researchers, graduate students and other professional categories in the field of information security and cybercrime.

*IJISC – International Journal of Information Security and Cybercrime* is a biannual publication published by RAISA with the purpose of analyzing information, computers and communications security and identifying new valences of cybercrime phenomenon.

Through the theoretical and practical addressed issues, the journal target are experts from information security or cybercrime field, university students, PhD students or people interested to improve or to update their knowledge in this domain.

### **JOURNAL SECTIONS:**

1. Advances in Information Security Research
2. Studies and Analysis of Cybercrime Phenomenon
3. Cyber-Attacks Evolution and Cybercrime Trends
4. Books Reviews and Conferences Analysis

Journal editorial board has specialists in information security and cybercrime, both in the academic structures police and academics, whose activity is under the careful guidance of the Scientific Council, composed of internationally recognized personalities.

The journal is indexed in international databases, such as Index Copernicus and Google Scholar.
